Legacy Of Absolute Integration

JSL Lifestyle is India's largest integrated stainless steel solution provider proffering a range of products and services through its diverse verticals ranging from products for industrial usage to kitchenware and tableware. At JSSL, we strive on the path of excellence with research and innovation. To cater to the evolving needs of business and consumers, we design and build products that add value to the life and make living better. JSSL demonstrates its muscle of stainless-steel manufacturing with wide capabilities for verticals such as:

In OEM services

Assisting a variety of companies in procuring stainless steel products and components across industries, it extends exhaustive capabilities and aggressive support in product development and delivery.

Stainless steel plumbing solutions

An integrated plumbing solution provider in stainless steel with comprehensive pipes and fitting solutions in grade 316L, guaranteeing quality products with easy installation.

Public sector manufacturing projects, especially Indian Railways

JSSL Mobility is the tender-based manufacturing arm that caters to the mobility sector, especially Indian Railways and Delhi Metro with a wide variety of products like retention tanks, coaches, chassis etc.

Urban development projects

It provides a wide variety of infrastructural products such as benches, cladding, dustbins, bus shelters, toilets, sanitary solutions etc. with a dynamic and versatile service outlook.

A recent addition in our home-lifestyle business, Arc is a revolutionary stainless steel kitchen brand positioned in the mass-prestige segment in the Indian retail landscape

India's first exclusive home lifestyle brand in stainless steel positioned exclusively in the premium segment proffering a broad home-ware and home-space range for its patrons, comprising Tableware, Home Décor, Bespoke Kitchens, Vanities and Wardrobes.

Catering To Diverse Requirements

JSLL Value Engineering works towards manufacturing stainless steel components for development of products across industries. We assist our partners by undertaking high manufacturing and delivering full or part production.

Being the original equipment manufacturer, we also have our in-house backward integration that processes the raw material into end-product. We go all out to create differentiated yet functional designs in sync with our clients across segments. We are focused to bring the global techniques to India and taking Indian capabilities of sharp manufacturing to the world.

Empowered by skilled workforce with immense talent

Exhibiting the combined strength of human and machine

Manufacturing high-quality stainless steel products

Integrating Precision With Innovation

Striving towards developing new value-added stainless steel products with skill improvement and adapting new technologies.

Leading player in stainless steel sector in B2B and B2C interface

State-of-the-art plant with the ability to serve large quantities in short lead time

Self-reliant for product manufacturing securing competitive pricing

Honing business partner relationships with long term vision and perspective

Strives for unique collaborations adding to product innovations and development

A unique blend of manufacturing abilities and marketplace sensibilities

Strong in-house designing and tooling capabilities of global repute

High level of innovation & technological advancement

100% customer satisfaction focus and compliance with customer

No compromises on product quality & forward integration with our retail footprint

Powered by a strategic understanding of the market and the category

SOP for each process customised solutions

Our Pillars Of Strength

Our Manufacturing Ace.

State-of-the-art manufacturing facilities in rohad and pathredi

Best-in-class machines to ensure a high-quality finish

In-house polishing, etching & pvd coating capabilities ensuring a wide range of options to enhance the look

Quality assurance lab ensuring every product has a uniform and an unmatched quality

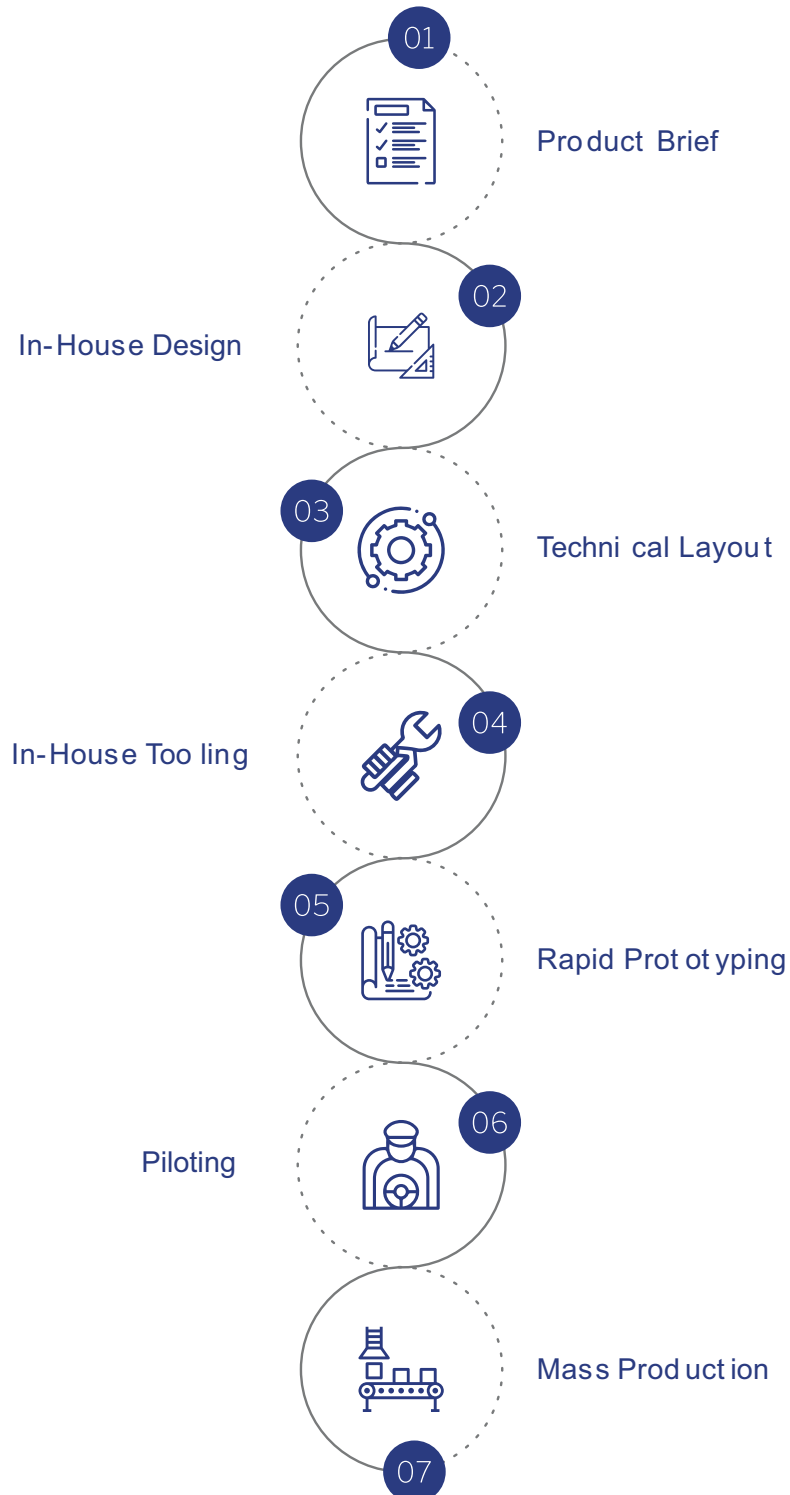

Generates a laser beam that stimulates a lasing material by electrical discharges in a closed container.

Well-certified world-class plant securing all required compliances

Procedure Framework

Systematic Approach For Systematic Output

Plants: The Nerve Centre Of Engineering

Our manufacturing is backed by three robust plants that are in Pathredi, Rohad, and Chennai. These state-of-the-art manufacturing plants are well equipped with cutting-edge manufacturing and fabrication technology of global repute and certification. Our facility in Pathredi is spread across an area of massive 30,351 sq. m. that has a fabrication capacity of 5,000 MT per annum. Our other plant in Chennai is spread across 8,093 sq. m., while the Rohad plant is spread across 20,234 sq. m.

Our all three plants are well geared with the new age technology of automated machines installed for optimum utilisation of resources with cost-effective methodology.

Equipment To Create Excellence

Laser Cutting Machine

Generates a laser beam which stimulates a lasing material by electrical discharges in a closed container.

Sheet Bending Machine

Used to assemble a bend on a sheet as per desired.

Shearing Machine

A multipurpose device used for cutting alloys and other sheet metals.

State-Of-The-Art Equipments
To Create Functional Products
That Eases Lifestyle

Cold Roll Forming Process

Our cold roll forming process is well equipped for cutting pipes/rod/sectional profile by using jigs.

Robotic Welding Machine

Capable of doing welding and cutting operations as well as used to weld specific sheets including sheet metal, welded wire mesh.

Laser Welding Machine

Assists to join pieces of metal or thermoplastics through the use of a laser.

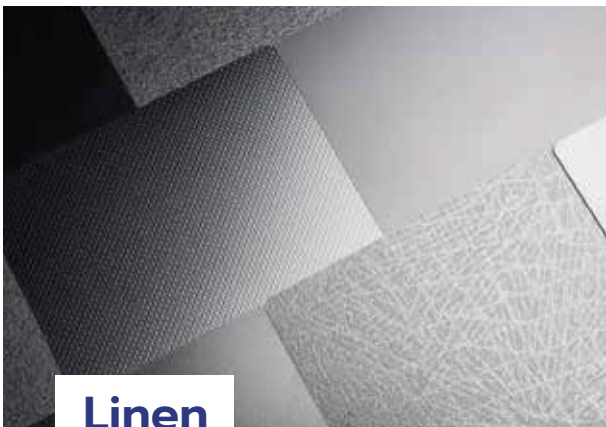

Types Of Coating

PVD Coated

Designed To Deliver Optimum Value

Fire Extinguishers

Handheld

A compact fire extinguisher made of stainless steel with easy discharge mechanism containing simple aerosol valve mechanism like a deodorant.

Fire Extinguishers

Portable

We design customized fire extinguisher according to specified requirements. It currently comes in various sizes of 0.5 litre, 1 litre, 1.5 litres, 3 litres, 6 litres, 9 litres and 15 litres.

Stomach of RO System

Stainless Steel stomach of RO systems to assure purity for assured health.

A complete range of stainless steel consumer durable products defined by high-quality, aesthetics and high durability

Hand-Made Sinks

Single | Single With Tray | Double

Handmade stainless steel sinks are durable and sleek which brings a contemporary look to the kitchen.

Stand Mixer Bowls

Customized stainless steel mixer bowls designed for ultimate ease. With firm grip handles and ergonomic design, the bowls offer versatile uses without creating any mess.

Automobile Parts

Our capabilities enable us to manufacture stainless steel parts used in automobile like car exhaust systems hose clamps and seatbelt springs.

Restaurant Food Serving Products

We manufacture utensils used in restaurants in high-grade stainless steel. The utensils in stainless steel are hygienic and aesthetically appealing.

Mixer Jars (Different sizes & finishes)

Available in different designs and sizes, the mixer jars are manufactured with high grade stainless steel. It is durable and apt for usage of longer durations.

Original Brand Manufacturing (OBM)

As one of the leading OEM in Stainless Steel, we also manufacture finished goods for different brands from in-house designing to prototyping to mass production.
