*SWITCH TO **STAINLESS***

HERITAGE OF JINDALS

Established in 1970 by steel visionary Shri OP Jindal, Jindal Group has spanned across 50+ countries marking a global footprint and is positioned as top 5 business conglomerates in India. The group is backed by a workforce of diverse professionals.

Jindal Stainless is an eminent part of the massive JSHL, contributing a staggering \$2.9 B annually through its varied businesses. It is one of the world's largest integrated manufacturer of stainless steel. The group has a state-of-the-art stainless steel plant in Odisha and is a market leader in galvanized steel and saw pipes.

JSL LIFESTYLE: **Legacy Of Absolute Integration**

JSL Lifestyle is India's largest integrated stainless solution provider, proffering a range of products and services through its diversified verticals - JSLL Value Engineering (in OEM services), JSLL Mobility (public sector manufacturing projects especially Indian Railways), Jindal ARC Infra & Plumbing Solutions, Jindal Kitchens (bespoke and masstige stainless steel kitchens) and Arttd'inox (a premium designer home fashion lifestyle brand) extending kitchens and homeware solutions.

CATALYSING STAINLESS TRANSFORMATION

Manufacturer of OEM products specialized in Stainless steel metal. It extends exhaustive capabilities & aggressive support in product development & delivery.

Following its rich legacy, Jindal Mobility is our manufacturing arm that caters to the Mobility Sector, especially Indian Railways & Metros. We are IRIS certified. With the use of a state-of-the-art facility, we believe in innovating wide range of stainless steel products like retention tanks, platform benches, complete shell under frame and much more.

India's first exclusive home lifestyle brand in stainless steel positioned exclusively in the premium segment proffering a broad home-ware & home-space range for its patrons, comprising Tableware, Home Decor, Bespoke kitchens, Vanities & Wardrobes.

JINDAL PLUMBING

An integrated plumbing solution provider in stainless steel with comprehensive pipes and fittings solutions in grade EN 316L and JIS 304 & 316L, guaranteeing quality products with easy installation.

JINDAL INFRA

It provides a wide variety of infrastructural products such as Railings, Facade, Claddings, BQS, Structures, Benches, Dustbins, Toilets, Sanitary Solutions etc. with a dynamic & versatile service outlook.

JINDAL KITCHENS

A recent addition in our homelifestyle business, Jindal Kitchens is a revolutionary stainless steel kitchen brand positioned in the mass prestige segment in the Indian retail landscape.

LEADING THE STAINLESS REVOLUTION

JSLL Value Engineering is leading the way in stainless steel revolution with development of components for products across various industries. We are poised as a global strategic supplier of Stainless Steel products and assist our partners by undertaking efficient manufacturing and delivering full or part production. Being an original equipment manufacturer, we also maintain in-house backward integration for right selection & manufacturing of stainless steel grade as per product application.

We go all out to create differentiated yet functional designs in sync with our clients across segments. We are focused to bring the global techniques to India and taking Indian capabilities of sharp manufacturing to the world.

MANUFACTURING PLANTS :

ENGINEERING VALUE

Our manufacturing is backed by three robust plants that are in Pathredi, Rohad, and Chennai. These state-of-the-art manufacturing plants are well equipped with cutting-edge manufacturing and fabrication technology of global repute and certification. Our facility in Pathredi is spread across an area of massive 30,351 sq.m., that has a fabrication capacity of 5,000 MT per annum. Our second plant in Rohad is specialized in sheet metal deep draw and stamping. It is spread across 20,234 sq.m. Our third plant in Chennai is spread across 8,093 sq.m.

All three plants are well geared with the new age technology of automated machines installed for optimum utilisation of resources with cost-effective methodology.

PATHREDI PLANT

The Pathredi facility is spread over a covered area of massive 30,351 sq.m. with a fabrication capacity of 5,000 MT per annum and caters to Mobility, Infrastructure, Value Engineering, Sanitation, and Kitchen verticals.

ROHAD PLANT

The Rohad Plant is spread across 20,234 sq.m. and offers a wide range of in-house production and finishing capabilities for best-in-class quality products. The plant caters to Value Engineering and Arttd'inox. Plant specialization in deep draw & stamping facilities.

CHENNAI PLANT

The Chennai Plant is semi-automated and is spread across 8,093 sq.m. with a fabrication capacity of 3,000 MT per annum. The plant is dedicated to Mobility and specializes in products for Railways and Metros.

WHY CHOOSE JINDAL VALUE ENGINEERING?

- Organised player for your stainless steel products solutions
- Authenticity in quality and grade selection
- In-house advance tooling shop
- RM backend integration
- End to end support i.e. from RM to final product delivery
- Global strategic supplier to countries like USA, Middle East & Europe
- ISO 9001, 14K, 45K, CE, IATF 16949 certifications
- SCOC certified supplier
- Certified supplier base for BOP, JW parts

INTEGRATING **PRECISION** WITH INNOVATION

Striving towards developing new value-added stainless steel products with skill improvement and adapting new technologies.

Leading player in stainless steel sector in B2B and B2C interface

State-of-the-art plant with the ability to serve large quantities in short lead time

Self-reliant for product manufacturing securing competitive pricing and offering value addition and value engineering solutions

Honing business partner relationships with long term vision and perspective

Strives for **unique collaborations** adding to product innovations and development

Fine precise tooling for defect free parts

100% customer satisfaction focus and compliance with customer

Inhouse coating setup- use of PVD & PU booth for addition of color surface finishes

No compromise on product quality & forward integration with our retail footprint.
Regular CMM Inspection of CTQ parameters

OUR **PILLARS OF STRENGTH**

Manufacturing ace with leading edge technologies, best in class machinery and unmatched quality. Our manufacturing plants are well certified and work under all necessary compliances

State-of-the-art manufacturing facilities in Rohad and Pathredi

Best-in-class automated polishing machines to ensure a high quality finish

In-house PU, Etching & PVD coating capabilities ensuring a wide range of options to enhance the look of metals

OUR **MANUFACTURING ACE**

Quality assurance lab ensuring every product has a uniform and an unmatched quality

Generates a laser beam that stimulates a lasing material by electrical discharges in a closed container

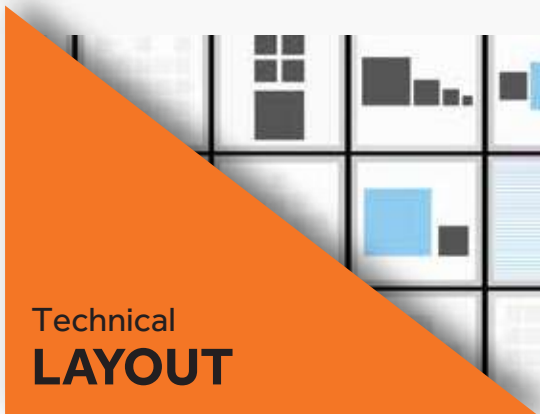

Well certified world class plant securing all required compliance.

SYSTEMATIC APPROACH FOR SYSTEMATIC OUTPUT

Technical drawing of a roof structure. The drawing includes a cross-section and a plan view. The cross-section shows a gabled roof with a central ridge and sloped sides. The plan view shows a circular or polygonal base with radial lines representing the roof structure. Dimensions and labels are present, including 'Dachstuhl' and 'Dachstuhl'.

EQUIPMENT TO CREATE EXCELLENCE

LASER CUTTING MACHINE

Cutting of standard, customized blanks within shortest cycle time at optimum efficiency.

COORDINATE MEASURING MACHINE

Coordinate measuring machine used for accurate and precise measurement of critical to quality parameters (CTQs).

SINGLE ACTION PRESS

A multipurpose machine used for blanking, stamping & punching processes.

STATE-OF-THE-ART

EQUIPMENT TO CREATE FUNCTIONAL PRODUCTS THAT EASES LIFESTYLE

COLD ROLL FORMING PROCESS

Our cold roll forming process is well equipped for cutting pipes/rod/sectional profile by using jigs.

ROBOTIC WELDING MACHINE

Capable of doing welding and cutting operations as well as used to weld specific sheets including sheet metal and welded wire mesh.

LASER WELDING MACHINE

Assists to join pieces of metal or thermoplastics through the use of a laser.

A COMPLETE RANGE OF **STAINLESS STEEL CONSUMER DURABLE PRODUCTS** DEFINED BY **HIGH-QUALITY, AESTHETICS & HIGH DURABILITY**

HANDMADE SINKS

SINGLE | SINGLE WITH TRAY | DOUBLE

Handmade stainless steel sinks are durable and sleek which brings a contemporary look to the kitchen.

STAND MIXER BOWLS

Our customized stainless steel mixer bowls are designed for ultimate ease. With firm grip handles and ergonomic design, the bowls offer versatile uses without creating any mess. In addition, JSLL provides a wide range of polishing finishes & textured patterns to enhance the looks of mixer bowls.

AUTOMOBILE PARTS

Our capabilities enable us to manufacture stainless steel parts used in automobiles like SS ATS heat shields and aspire to create exhaust systems for commercial vehicles.

MIXER JARS & BLADES

(DIFFERENT SIZES & FINISHES)

Available in different designs and sizes, the mixer jars and blades are manufactured with high-grade stainless steel. It is durable and apt for longer duration.

ORIGINAL BRAND MANUFACTURING (OBM)

As one of the leading OEMs in stainless steel, we also manufacture finished goods for different brands from in-house designing to prototyping to mass production of stainless steel metal products and handles.

TRAINING & DEVELOPMENT

WELDING SCHOOL-WHY?

Welding is a unique process for developing a skilled workforce. However, if we deploy fresh welders on the shop floor directly, we will not receive defect-free products and will also be lost during production. In addition, it will lead to defects at the customer end and customer dissatisfaction.

WELDING SCHOOL IS A SPECIAL INITIATIVE FOR DEVELOPING SKILLED MANPOWER.

Welding school provides three levels of training, from unskilled welders to highly skilled welders. All three levels have defined meaning, training method, time frame, reviewing approach, and evaluation.

Level 1 includes- Machine function, process understanding, tooling ideas, CTQ parameters & inspection, JH Steps, familiarity with parts & product, samples preparation with weld quality 60% and exam.

Level 2 includes- Weld/machine shop training, welding quality check training (up to 90%), all defects, remedies knowledge, and exam.

Level 3 includes- Welding quality checks up to 99.9%, identifying all defects, their reason, and remedies alongside the ability to set machine parameters.

KEY FOCUS ON

1. Tungsten Inert Gas (TIG) Welding Process
2. Metal Inert Gas (MIG) Welding Process
